Revised 10-23-2014  
Questions Only

1. Will the planes be taking off and landing 24 hours per day on the new runway or are there any restrictions on the planes arrival and departure times?

While the runway is open 24 hours, we have implemented a voluntary use restriction between 10 p.m. and 5 a.m. daily. Pilots are requested to use the north runway during these hours.

2. What type and size of planes taking off and landing on the new runway?

The runway can handle aircraft up to a Boeing 747. However, it is expected to be used primarily by A-320 and B-737 series aircraft.

3. What is the airport doing about take-off and landing safety?

The airport maintains the runway to FAA standards.

4. How can I find out if my house is within the noise mitigation area?

Go to the Noise Mitigation web site at [flnoisemitigation.com](http://flnoisemitigation.com) or call the Noise Mitigation Outreach Center at 954-924-2224.

5. As an example, there are houses located nearby the south runway, in Melaleuca Gardens. What protection are the houses and residents being given to avoid health and structural problems due to the runway's expansion? Is there a cost for these fixes? If so, how much and who pays?

Refer to the Interlocal Agreement entered into by the City and the County.

6. Where do I go and whom do I contact to express my concerns, and raise complaints about the residents and properties affected by the runway expansion?

Be more specific on the type of complaint since several Broward County and BCAD staff respond to different types of issues.

7. Will there be an increase in noise, pollution, and dust and dirt as a result of the new runway?

The Environment Impact Statement discussed the changes in noise, pollution, dirt, and dust.

8. If so, will the new runway generate additional vehicle traffic on the roadway in the area?

The Environment Impact Statement discussed the changes in traffic patterns.

9. What will be the economic benefit for Dania Beach and Broward County after the runway has been expanded?

An economic study was not conducted on the economic impact after the completion of the South Runway.

10. When planes are taking off and landing, are there flight corridors, governed by Standard Instrument Departure and Standard Instrument Arrival, that pilots are required to obey? What is being done to enforce these standards? How can a citizen get information regarding this matter?

The FAA administers flight procedure enforcement.
